

EDUCATION

Bowdoin College, Brunswick, ME **May 2026**
BA in Computer Science & History (Double Major) | Asian Studies Minor
Cumulative GPA: 3.77
Relevant Courses: Algorithms, Data Structures, Distributed Systems, Big Data, AI, HCI, Financial ML, Systems, Computational Complexity
Honors Project (CS & History): Researching retrieval-augmented generation (RAG) systems for historical narratives, analyzing how AI systems shape public memory, knowledge formation, and user trust
Leadership & Activities: Alternative Spring Break Trip Leader (Ethical AI); Science Journal CS Writer; Student Government, Faculty Committee Representative (Library)

SKILLS

Programming: Python (NumPy, Pandas, scikit-learn), Java, TypeScript/JavaScript, C, C#, SQL, HTML/CSS
Backend & Infrastructure: Next.js, FastAPI, PostgreSQL, Redis, Docker, OAuth 2.0, REST APIs, Prisma
AI & Data: OpenAI API, agentic AI, LangChain, ML modeling, data and feature engineering, model evaluation
Tools & Methods: Git, Agile/Scrum, Test Automation, Concurrency, Vercel, ArcGIS
Languages: English (Native), Mandarin (Advanced), Cantonese (Fluent)

EXPERIENCE

Oak AI (Innovate for Maine Fellowship), Orono, ME **May 2025 – Aug 2025**
Intern

- Optimized AI classifier throughput by 10× and reduced API integration latency 15x.
- Designed scalable PostgreSQL schemas supporting low-latency queries and high-volume data pipelines.
- Partnered with product and business teams to balance scalability, cost, and customer impact.
- Rapidly prototyped and tested features through iterative cycles.

Bowdoin College Baldwin Center for Learning and Teaching, Brunswick, ME **Feb 2025 – May 2026**
Writing Assistant

- Coach peers on analytical communication, structured argumentation, and clear writing.

Bowdoin College Computer Science Department, Brunswick, ME **Jan 2024 – May 2024, Sep 2025 – May 2026**
Introduction to Computer Science Learning Assistant

- Mentor students in Python programming, computational problem-solving, and systems thinking.

Bowdoin College Hawthorne-Longfellow Library, Brunswick, ME **Oct 2022 – May 2026**
Public Services Assistant

- Serve as first point of contact for patrons, leveraging problem-solving and interpersonal skills

PROJECTS

Meeting Intelligence App | [Next.js](#), [PostgreSQL](#), [OpenAI API](#), [Prisma](#), [Vercel](#)

- Built a full-stack AI tool generating summaries, action items, and risk flags from raw meeting notes.
- Integrated OpenAI API with prompt engineering to produce outputs across multiple formats.
- Deployed production application on Vercel with serverless Postgres.

Financial Portfolio Analytics Dashboard | [Python](#), [Tableau](#), [Pandas](#), [yfinance](#), [Plotly](#), [Streamlit](#)

- Created a Tableau dashboard visualizing 2 years of market data across 6 asset classes with filtering.
- Engineered Python data pipeline to calculate derived metrics (returns, volatility, drawdown, Sharpe ratio).
- Deployed companion Streamlit app with OpenAI integration generating investment commentary.

Predicting Ecological Trends with Machine Learning | [Python \(Pandas, scikit-learn, Matplotlib\)](#), [Medium Blog](#)

- Built and evaluated a Random Forest model (78.4% accuracy) on 47k+ ecological records.
- Engineered features, cleaned noisy datasets, and analyzed model interpretability.
- Published technical writeup on Medium communicating methodology and results to a general audience.
